

Bir spor salonuna ait üyelik sistemi UML diyagramı verilmiştir.  
Main metot içi ve konsoldaki çıktı şu şekildedir:

```

Sports s1 = new Sports("tennis", 10, 25.90);
Sports s2 = new Sports("football", 15, 55.90);
Sports s3 = new Sports("basketball", 20, 45.90);
  
```

```

Member m1 = new Member("Jane Doe", 100);
m1.getInfo();
  
```

```

Member m2 = new Member("John Doe", 200);
m2.getInfo();
  
```

```

m1.registerCourse(s1);
m1.registerCourse(s2);
m1.registerCourse(s3);
m1.listCourses();
  
```

```

System.out.println(m1);
System.out.println(ClubCard.getCounter());
  
```

### OUTPUT:

```

Jane Doe 2023001
John Doe 2023002
Registered to course: tennis
Registered to course: football
Registered to course: basketball
1.tennis
2.football
3.basketball
Member [name=Jane Doe, credit=100.0]
  
```

2023003
